OnYourFrequency

Training Services offer a comprehensive set of training solutions for planning and optimisation. Services comprise of a wide range of training programmes specifically designed for telecom experts and professionals. Our portfolio also includes assessment and certification services for an enhanced learning experience.

Our trainers with extensive practical experience are able to provide repeatable models for daily operations. We work closely together with you to design training programmes adopted to meet your organisational needs. Our training programmes are modular in structure and well suited for tailoring according to your specific requirements. Learning sessions include a variety of examples, exercises, and tasks to provide the maximum benefit to the audience.

Training services offer programmes for wireless technologies like:

- GSM, GPRS, EDGE, TETRA
- UMTS, HSPA, LTE, WiMAX

The programmes address topics like:

- Radio Propagation
- Coverage, Capacity and Interference
- System functionality
- Measurements & Monitoring
