**European Communications Engineering (ECE) Ltd** is a technical leader in the field of cellular planning and optimisation. ECE Ltd is focused on the main mobile technologies: GSM, UMTS, HSPA, LTE, WiMAX and TETRA. We offer you service and software products along with global solutions.

We are able to provide our customers long-term benefits through highly educated and experienced personnel. Moreover, strong cross-functional in-house competence and our wide collaboration network enable us to deliver advanced services and SW solutions for practical needs.

In addition to the services we provide, our strong in-house research and development activity guarantees our customers a position at the forefront of technical development. We will continue to work hard to ensure that we are on your frequency now and in the future.

**Dimensioning and Planning Services** contain all planning process related tasks from preliminary planning to the network verification phase. The service we provide can be modular or turn-key based. Services can be tailored according to the customer's needs based on task, geographical or quality requirements.

**Optimisation and Operation Services** offer a solution for continuous care processes including advanced network analysis based on field measurements, and statistics coming from Performance monitoring. Services can be tailored based on a modular or turn-key approach.

**Measurement Services** offer a wide range of measurements from model tuning and testing to verification and benchmarking campaigns. A combination of our in-house equipment and tools and commercial applications are utilized in the most efficient way.

**Training Services** offer a wide range of planning and optimisation training programs covering GSM, UMTS, HSPA, LTE, WiMAX and TETRA technologies. Trainers with extensive practical experience are able to provide repeatable models for daily operations. Training events are based on lectures, exercises and demonstrations.

**Advisory Service** is higher level consulting based on customers' requests. Our most experienced consultants offer their services in such areas as management and techno-economical consulting.

**eEPOS** is a planning and optimisation tool offering operators a unique solution to their complex organisational requirements for customer feedback, financial reporting and technical planning work.

## KEY FACTS AND REFERENCES

<b>Founded</b>	1998
<b>Personnel</b>	More than 30 experts (2007)
<b>Financial status</b>	AAA (since 2004)
<b>Projects</b>	Hundreds of projects in more than 50 countries in Africa, Americas, Asia, Australia, Europe, and Middle East.
<b>Mission</b>	Service and Software solution provider

<b>Dimensioning &amp; Planning Services</b>	> 20 countries and 20 operators
<b>Optimisation &amp; Operation Services</b>	> 25 countries and 30 operators
<b>Measurement Services</b>	> 10 countries and 10 operators
<b>Training Services</b>	> 40 countries and 60 operators
